EDUCATION

St. Francis Institute of Technology <i>Bachelor of Technology in Electronics & Telecommunication Engineering; CGPA: 6.7</i>	Mumbai, India <i>Expected May 2026</i>
Nirmala Memorial Foundation College of Commerce and Science <i>Higher Secondary Certificate (HSC); Percentage: 58%</i>	Mumbai, India <i>2022</i>
St. Lawrence High School <i>Secondary School Certificate (SSC); Percentage: 75.40%</i>	Mumbai, India <i>2020</i>

EXPERIENCE

Business Analytics Intern <i>BharatSkillz (Startup)</i>	Aug 2025 – Oct 2025 <i>Mumbai, India</i>
- Automated ETL workflows using SQL and Python (pandas) to integrate and process 10K+ customer records from multiple sources, reducing data preparation cycles by 60% and ensuring 99% data quality for downstream analytics - Engineered interactive Power BI dashboards tracking 15+ performance metrics including customer behavior, training effectiveness, and KYC compliance; delivered actionable insights enabling stakeholders to optimize workflows and reduce bottlenecks by 40%	
Technical Intern <i>GET Tutorials</i>	Jun 2025 – Jul 2025 <i>Mumbai, India</i>
- Developed production-grade chatbot leveraging Python NLP libraries and Django backend, achieving 85% query resolution accuracy across 500+ test cases and demonstrating scalable customer interaction automation - Designed Power BI dashboards visualizing user engagement and campaign performance metrics; implemented Git version control and documentation standards adopted across the team	
Data Analytics Virtual Intern <i>Deloitte</i>	May 2025 <i>Remote</i>
Executed end-to-end analytics case studies involving data collection, integration, cleansing, and transformation; delivered executive-ready dashboards and performance reports using Power BI and Excel	

PROJECTS

Banking Analytics Dashboard <i>Power BI, SQL, Excel</i>	2025
- Architected banking intelligence platform analyzing 50K+ client records with KYC compliance tracking, credit risk segmentation, and customer demographic profiling across 12 interactive visualizations - Implemented advanced cross-filtering and drill-down capabilities enabling instant identification of high-risk customer cohorts (debt-to-income >40%, credit score <600) for proactive risk management	
Customer Sales Analytics Dashboard <i>Power BI, SQL, Python, Excel</i>	2025
- Built end-to-end customer sales analytics solution integrating multi-source datasets using SQL and Python; performed exploratory analysis identifying sales trends, customer segmentation patterns, and revenue optimization opportunities - Delivered dynamic Power BI dashboards tracking customer response rates, sales performance, and campaign effectiveness with interactive filtering; insights drove 15% improvement in targeted marketing strategies	

TECHNICAL SKILLS

Programming Languages: Python (pandas, NumPy, Matplotlib), SQL (querying, joins, CTEs, window functions), SAS (beginner), HTML, CSS

Data & Analytics Tools: Power BI, Advanced Excel (pivot tables, macros, VBA, data modeling), PowerPoint, Looker (exposure)

Data Management: ETL automation, Data integration, Data quality assurance, Master Data Management, SAP (fundamentals)

Developer Tools & Methodologies: Git, GitHub, VS Code, Jupyter Notebook, Django (basic), Agile methodology (exposure)

Core Competencies: Campaign Analytics, Performance Reporting, Dashboard Development, Customer Insights, Data Governance, Process Automation, Stakeholder Collaboration, Root Cause Analysis, Statistical Analysis, Data Visualization
